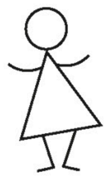
The five times table

All that you need to count in fives are your hands. And if you can count in fives, then you can multiply by five too!

5×

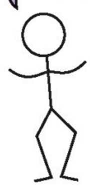
Have you spotted the pattern?



Here's the 5 times table:

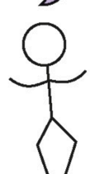
1 × 5 = 5
2 × 5 = 10
3 × 5 = 15
4 × 5 = 20
5 × 5 = 25
6 × 5 = 30
7 × 5 = 35
8 × 5 = 40
9 × 5 = 45
10 × 5 = 50
11 × 5 = 55
12 × 5 = 60

Yes, look – all the answers in the **5×** table end in **5** or **0**!



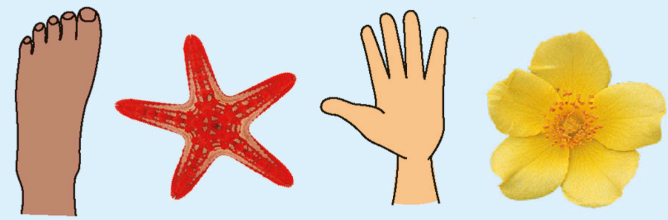
If you multiply **5** by an **odd** number, the answer will end with **5**.

If you multiply **5** by an **even** number, the answer will end with **0**.



Counting in fives

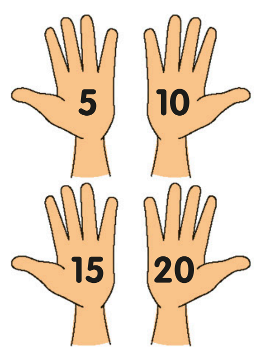
All these things come in groups of five. You can use the **5×** table to quickly add them up. Count like this: **5, 10, 15, 20, 25, 30, 35, 40, 45, 50, 55, 60**.



five toes five arms five fingers five petals

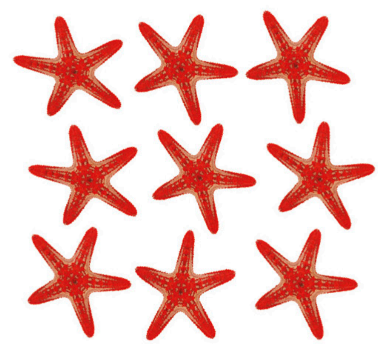
Count these in groups of five

How many fingers on **4** hands?



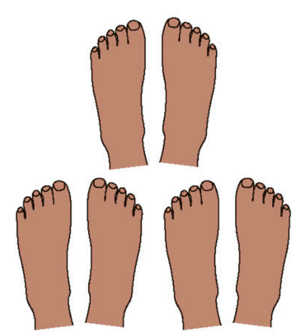
4 × 5 = 20

How many arms on **9** starfish?



How many petals on **7** flowers?

How many toes on **6** feet?



Answers: 45 arms, 35 petals, 30 toes.
