# Answers:

## 138–139 Fractions
## 140–141 Groups of 9

**138**

① What is half ($\frac{1}{2}$) of each number?

18 **9**   10 **5**   6 **3**   24 **12**

② What is a third ($\frac{1}{3}$) of each amount?

12g **4g**   27g **9g**   33g **11g**   42g **14g**

③ What is a quarter ($\frac{1}{4}$) of each number?

4 **1**   20 **5**   36 **9**   52 **13**

④ There are 60 carrots in a box.
How many carrots make up…

$\frac{7}{10}$ of the box? **42** carrots

$\frac{1}{10}$ of the box? **6** carrots   $\frac{2}{10}$ of the box? **12** carrots

⑤ There were 25 bananas, and $\frac{1}{5}$ were eaten.
How many bananas are left?

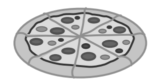
**20** bananas

**139**

⑥ What is three quarters ($\frac{3}{4}$) of each number?

12 **9**   24 **18**   32 **24**   44 **33**

⑦ What is $\frac{1}{8}$ of 48 slices of pizza?



**6** slices

⑧ What is $\frac{7}{10}$ of 40?

**28**

⑨ There are 30 children in a class. $\frac{3}{5}$ of the class have school dinners.
How many children **do not** have school dinners?

**12** children

⑩ Oliver picked 54 apples. $\frac{1}{6}$ were rotten.
How many apples were rotten?

**9** apples

At this level, children should be familiar with calculating fractions of amounts. Make sure they read the question carefully so that they don't get tricked by what the question is asking. For example, Question 9 asks for the number of children who do not have school lunches, so they need to calculate $\frac{2}{5}$ of the 30 children.

**140**

① There are 8 horse races in a day. If 9 different horses took part in each race, how many horses ran that day?

**72** horses

② Complete each sequence:

| | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| 0 | 9 | 18 | **27** | **36** | **45** | **54** | **63** | **72** | **81** |
| 108 | 99 | 90 | **81** | **72** | **63** | **54** | **45** | **36** | **27** |
| 45 | 54 | 63 | **72** | **81** | **90** | **99** | **108** | **117** | **126** |

③ Answer these questions:

Three multiplied by nine is **27**

Nine eights are **72**

Six groups of nine are **54**

④ A bunch of flowers costs £4.99. How much will 9 bunches cost?

**£44.91**

⑤ Work out these multiplication sums:

| | | | | | |
|---|---|---|---|---|---|
| 16 | 23 | 92 | 47 | 150 | 218 |
| x 9 | x 9 | x 9 | x 9 | x 9 | x 9 |
| **144** | **207** | **828** | **423** | **1 350** | **1 962** |

**141**

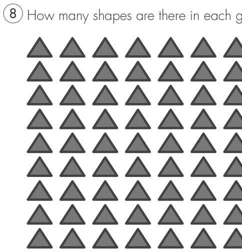
⑥ Divide each number by 9:

9 **1**   36 **4**   45 **5**   90 **10**   108 **12**

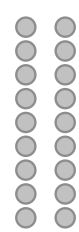
⑦ Jake needed £468 to buy a new television. He decided to save an equal amount over 9 weeks to reach the total. What is the amount he needed to save each week?

**£52**

⑧ How many shapes are there in each group?



**63**



**18**
