

Clingy geckos

Geckos are little lizards with a very **sticky skill**. Can you run up walls or hang upside down from the ceiling? Geckos can!

Tiny hairs

Hanging around

A gecko's clinging ability comes from thousands of **tiny hairs** on its toes. The hairs aren't sticky, but they're so small that they get caught up with surfaces, allowing the gecko to cling on.

Electric blue gecko

Geckos can be very colourful creatures.

Northern spiny-tailed gecko

Geckos don't have eyelids, so they lick their eyes to keep them clean!
