

Slip up!

Geckos can stick to almost anything, but they have trouble with **teflon**[™] – the material that non-stick frying pans are made from. Luckily for geckos, teflon isn't found in the wild!

Ulber's gecko

Oh no!
I'm slipping.

Can you see the
camouflaged gecko
on the bark?

Palm gecko

Yucatan
banded gecko

Green gecko

Some types can even change colour!

Standing's
day gecko
