

Fiddler crab

Male fiddler crabs are easy to spot because **one of their claws** is much bigger than the other!

Big claw

Most crabs walk sideways instead of forwards.

Decorator crab

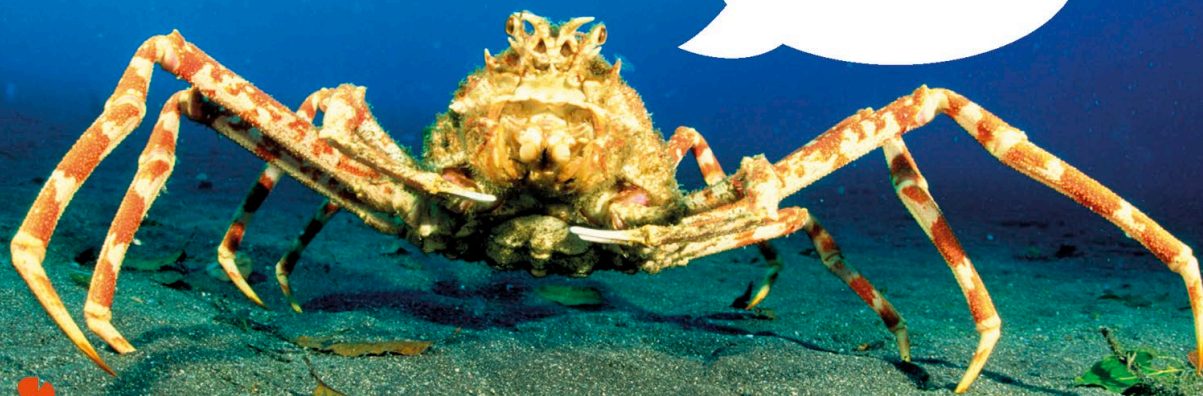

Decorator crabs have a sneaky skill. They **cover their bodies** in seaweed and sea sponges to hide from enemies.

Seaweed

Japanese spider crab

These monsters are the **giants** of the crab world. They can be found in chilly waters in Japan, and are absolutely huge!

My legs can be longer than a person is tall.
