

Unlike animals,
I get my energy
from the **SUN**.

Sunflower

Animals need to **eat**
to get their energy.
Plants don't eat food.

Animals breathe
in **OXYGEN** from
air or water.

Goldfish

All living things need to
breathe. Plants take in air,
but not the way animals do.

I use my
EYESIGHT to
look for food.

Hawk

Animals have more
developed **senses** such
as smell, touch, and sight.

...and people are animals too!

Orangutan

Penguin

Butterfly

Cat

Zebra

Tiger

Flamingo

Frog

Human
