

Gibbon

Fleas are great **jumpers**.
They can jump up to 100
times their height!

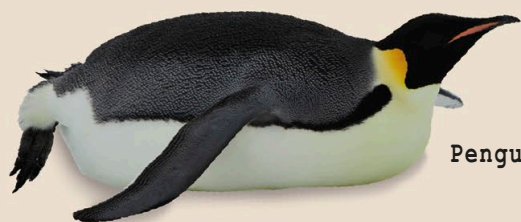

Flea

Many monkeys and
apes use their long
arms to **swing** from
branch to branch.

Lemur

Penguins have short legs and big
feet so they **waddle** around on
land. They can **slide**, too!

Penguin

One type
of lemur can
do a funny
dance!

Jerboa

The jerboa uses its hind
legs to **hop**, and lands
on its front paws.

The mudskipper fish can leave
water and **drag** itself on land
using its fins as arms.

Mudskipper

Alpine ibex

The alpine ibex is
an expert **climber**.
It can climb steep cliffs
thanks to its special hooves.

Geckos have special
hairs on their
feet for **climbing**.

Gecko
