

Madagascar

Satanic leaf-tailed gecko

One home

Some animals only live in one place.

We call these animals **“endemic”**.

Three out of four animals on Madagascar aren't found anywhere else on Earth.

Indri

Ring-tailed lemur

Lots of lemurs

Lemurs are a group of **primates** that only live on Madagascar. No one knows for sure how they got to the island, but they've been there for thousands of years.

Giraffe weevil
