

I'm off to
deliver a
message!

Camels are great at
carrying heavy loads
through the desert.

Before we had cars, people relied on
animal power. **Horses, camels,** and
donkeys are faster and stronger than
us, and can pull or carry heavy things.

A **sheep dog** is trained to control
sheep and tell them where to go. The
dog runs around the sheep, but never
harms them. This is called "herding".
