

Remarkable reptiles

Reptiles are a group of animals with a special type of protection. Their bodies are covered in waterproof plates called **scales**.

Alligator

My wide feet
help me run
on water!

Basilisk
lizard

Scale types

All reptiles are covered in scales, but there are different types of scales for different reptiles.

Crocodiles
have rough,
thick scales.

Lizards have
lots of little
scales. You can
see lizard scales
on this tail.
