

Endangered animals

Sadly, some animals are endangered, which means there **aren't many** of them left in the wild. But there are people working hard to change this.

Good news

Since whale hunting was banned, the number of **humpback whales** has gone up and they are no longer endangered!

ENDANGERED:
Bluefin tuna

The cause

Animals mostly become endangered because of people **hunting** them or causing **damage** to their habitats.

VULNERABLE:
Dugong

CRITICAL:
Hawksbill turtle

Thank you for
helping to keep us safe!
