POINTS OF REFERENCE

Diagram illustrating the relationship between Horizons, Zeniths, and the Ecliptic. The vertical line represents the Zeniths, and the horizontal line represents the Ecliptic. The labels 60°N, 40°N, 20°N, Zeniths, 20°N, 40°N, 60°N are positioned along the vertical line. The labels 20°N, 40°N, 60°N are positioned along the horizontal line. The diagram shows that the Zeniths are aligned with the Ecliptic, with the 20°N, 40°N, and 60°N lines indicating the positions of the Zeniths relative to the Ecliptic.

DEEP-SKY OBJECTS

	Galaxy
	Globular cluster
	Open cluster
	Diffuse nebula
	Planetary nebula
