

DID YOU KNOW?

Art historians think that Leonardo may have written approximately 28,000 pages, filling about 50 notebooks.

Around 6,500 pages survive today.

Leonardo wrote not only about painting, but also turned his attention to philosophy, the human body, architecture, warfare, and the study of plants and animals.

One of the most famous ideas in the notebooks is the Vitruvian Man. It is based on the work of the ancient Roman architect Vitruvius, who tried to find the perfect proportions in buildings and the human body. Having studied Vitruvius's writings, Leonardo set out to draw a perfectly proportioned man.

VITRUVIAN MAN

Leonardo demonstrated the ideal proportions of the body by showing an adult male with his arms and legs extended, and where his fingers and toes would touch a circle and a square that surrounded his body.
