

5 Using a ruler and a blunt knife (or one side of a pair of scissors) score all the dashed lines from the wrong side of the card. Score the lines marked with dashes and dots from the right side of the card.

6 Fold all the scored lines as marked, ensuring that all the creases are sharp. Assemble the body of the box by gluing both side flaps to the opposite side of the box.

7 Assemble the base of the box by first folding in the piece marked Base 1. Next fold down the two base flaps, and finally Base 2, tucking the attached flaps into the box.

8 Ensure that each of the creases made to the top part of the box is creased in the correct direction. Fill the box and push the flaps down and towards the centre to seal it.
