

HOW TO MAKE FIZZY BATH BOMBS

Materials

- * 155g (5½oz) bicarbonate of soda
- * Sieve
- * 1 medium mixing bowl
- * 75g (2½oz) citric acid
- * 2 small mixing bowls 
- * ¼ tsp purple natural mineral colour
- * Spoon
- * ½ tsp juniper essential oil
- * Water in a spray bottle
- * Both bomb mould

1 Measure out the bicarbonate of soda and sieve it into the larger mixing bowl.

2 Add the citric acid to the bicarbonate of soda and mix well with your fingers until fully combined.

3 Split the mixture between the two smaller bowls. Add the colour to the first bowl and mix well with a spoon or your fingers, ensuring no lumps remain.

4 Add approximately half the fragrance to the first bowl and half to the second bowl. Mix each bowl well, again making sure that no lumps remain.
