

HOW TO MAKE PAPER FLOWERS

Materials

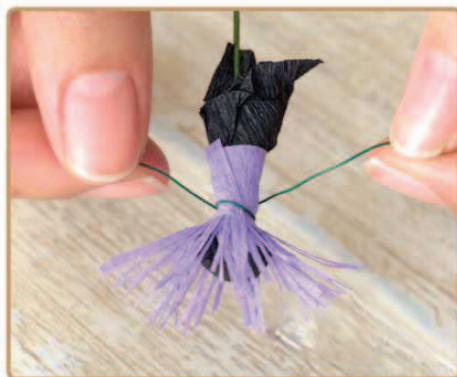

- * Crepe paper
- * Scissors
- * Glue
- * 20-gauge florist wire

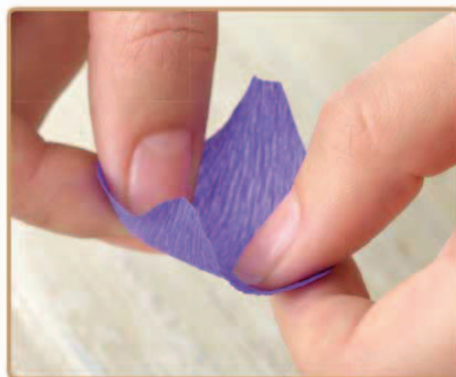

1 Cut two squares of black crepe paper, then cut one in half. Stretch out the square, then scrunch one of the rectangles into a ball and wrap the other rectangle around it.

2 Place the ball of crepe paper in the middle of the stretched square and dot small amounts of glue around it. Holding the centre down with straight florist wire, pull the corners of the square up around the scrunched paper and wire.

3 Cut a strip of purple crepe paper about 5cm (2in) long and fringe two-thirds of it. Wrap it around the black centre and glue in place, then secure with wire and paint the tips black.

4 Using the template, cut six petal shapes from the purple crepe paper. Push your thumbs into the centre and gently stretch outwards to give them a rounded shape.
