

Scrap paper sea scene

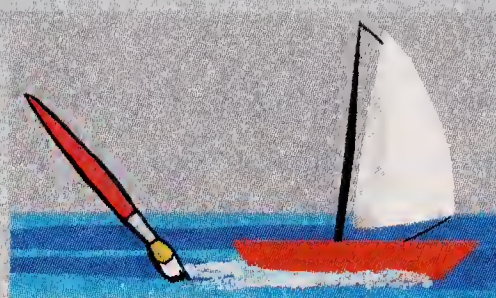

16 A boat on water

1. Glue some strips of blue paper across the bottom of a piece of paper. Cut out the hull of a boat and glue it on top.

2. Cut a thin strip for a mast and glue it on. Then, add a sail. Draw some ropes at the bottom and the top of the sail.

3. Dip a dry brush into thick white paint and dab it across the bottom of the boat, as the wash behind the boat.

You could draw some birds in the sky with a white pencil.

17 Fishing boat

Copy these paper shapes to make a fishing boat. Use different papers for the cabins, mast and sail.

This sea was made from overlapping strips of tissue paper.
