

Flower and butterfly cutouts

315 Simple flower

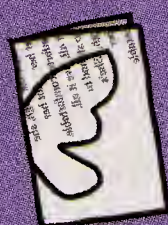

1. Cut a circle for the middle of the flower and glue it on to a piece of paper. Cut a thin stem and add it.

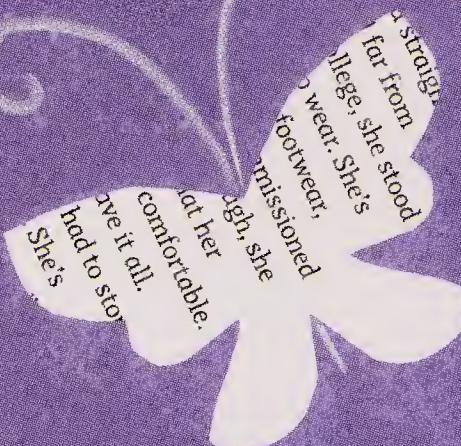

2. Fold a piece of paper several times and cut out a petal shape. Glue the petals around the flower. Add paper leaves, too.

316 Butterfly

Fold a piece of paper in half. Draw a butterfly wing against the fold, like this. Cut it out, unfold it and glue it on.

Draw antennae with a pencil.

317 Hand-drawn leaves

Draw leaves with a pencil rather than cutting out paper. You could draw the stem, too.
