

Cut-and-stick dogs

331 Simple dog

1. Cut a rectangular head and body from paper. Add a small paper collar or draw a neck.

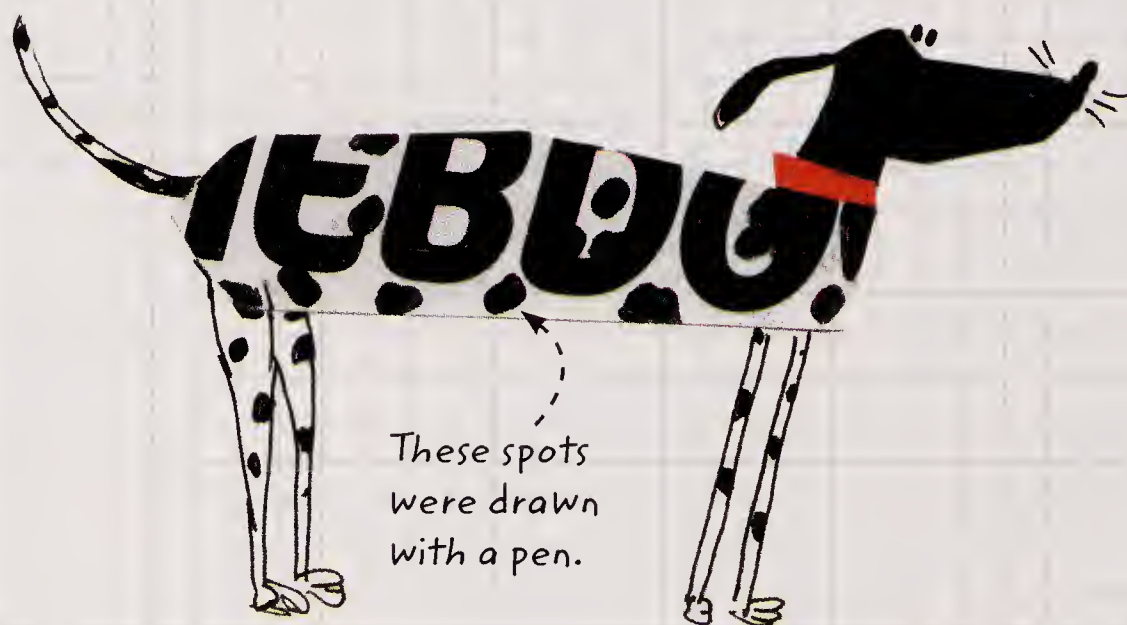

2. Use a black pencil or felt-tip pen to draw legs and a tail, then add eyes, ears and a nose.

332 Striped dog

Cut the head and body from barcodes from old magazines or packaging.

These spots were drawn with a pen.

333 Textured fur

Rip a body and head from corrugated cardboard packaging.

334 Sitting down

Rip or cut out a pear-shaped body, then add a head. Draw just one paw instead of four legs.

You could scribble lines for the moving legs of a dog digging a hole.
