

Folded tissue paper flowers

360 Fold a flower

1. Draw around a plate on a piece of bright tissue paper. Cut out the circle. Then, fold the shape in half four times.

2. Cut shapes out from around the edges of the shape. Then, open out the shape very carefully and glue it onto some paper.

3. Cut out more shapes of different sizes, and glue them on top of each other to make a flower.

You could draw around different circular objects such as saucers, mugs or rolls of tape.

361

Make a picture

Cut out lots of flowers and glue them on to a large piece of paper. Do different sizes and make them overlap.

362

Frilly edges

Cut out this shape to make a flower with lots of petals around the edge.

Circles cut with a hole punch
