

# Tissue paper jellyfish

The background for this picture was painted with layers of thick blue paint so that the brushmarks show. You don't need to let the paint dry before adding another layer.

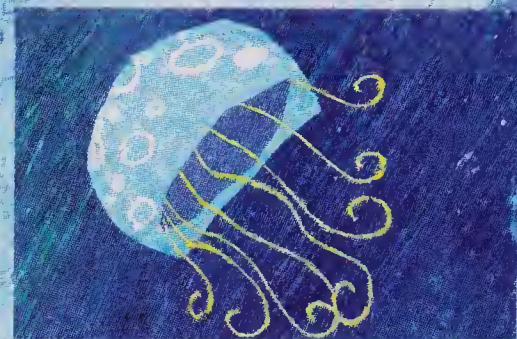

The spots and tentacles on all the jellyfish were drawn with chalk pastels.

You could fill in some of the spots on the body.

## 42 Simple jellyfish

1. Cut out a domed shape from tissue paper for a body and glue it on another piece of paper.

2. Glue on another piece shaped like a leaf for the underside of the jellyfish. Draw tentacles and spots.

## 43

### Sparkly fish

Make a fish from a chocolate wrapper or shiny wrapping paper. Add tissue paper fins and a tail.
