

Vintage car collage

47

Limousine

You don't need to be too neat.

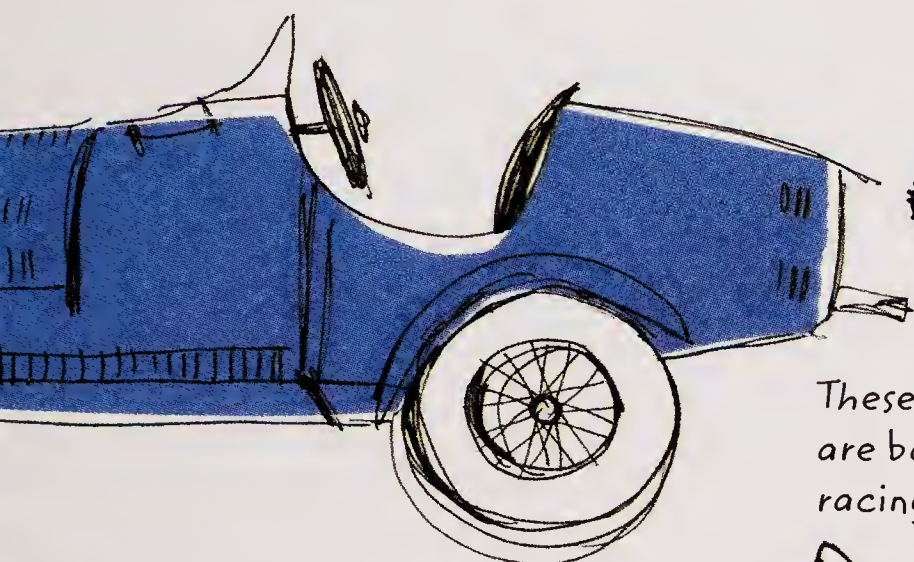

1. Draw shapes for the back wheel arch, a door and the front of a car, and cut them out.

2. Glue them onto another piece of paper, leaving narrow spaces between them.

3. Use a thin black pen to draw around the shapes, just inside the edge of the paper.

4. Draw the roof of the car and a steering wheel. Add windows, the wheels, a spare wheel and lights.

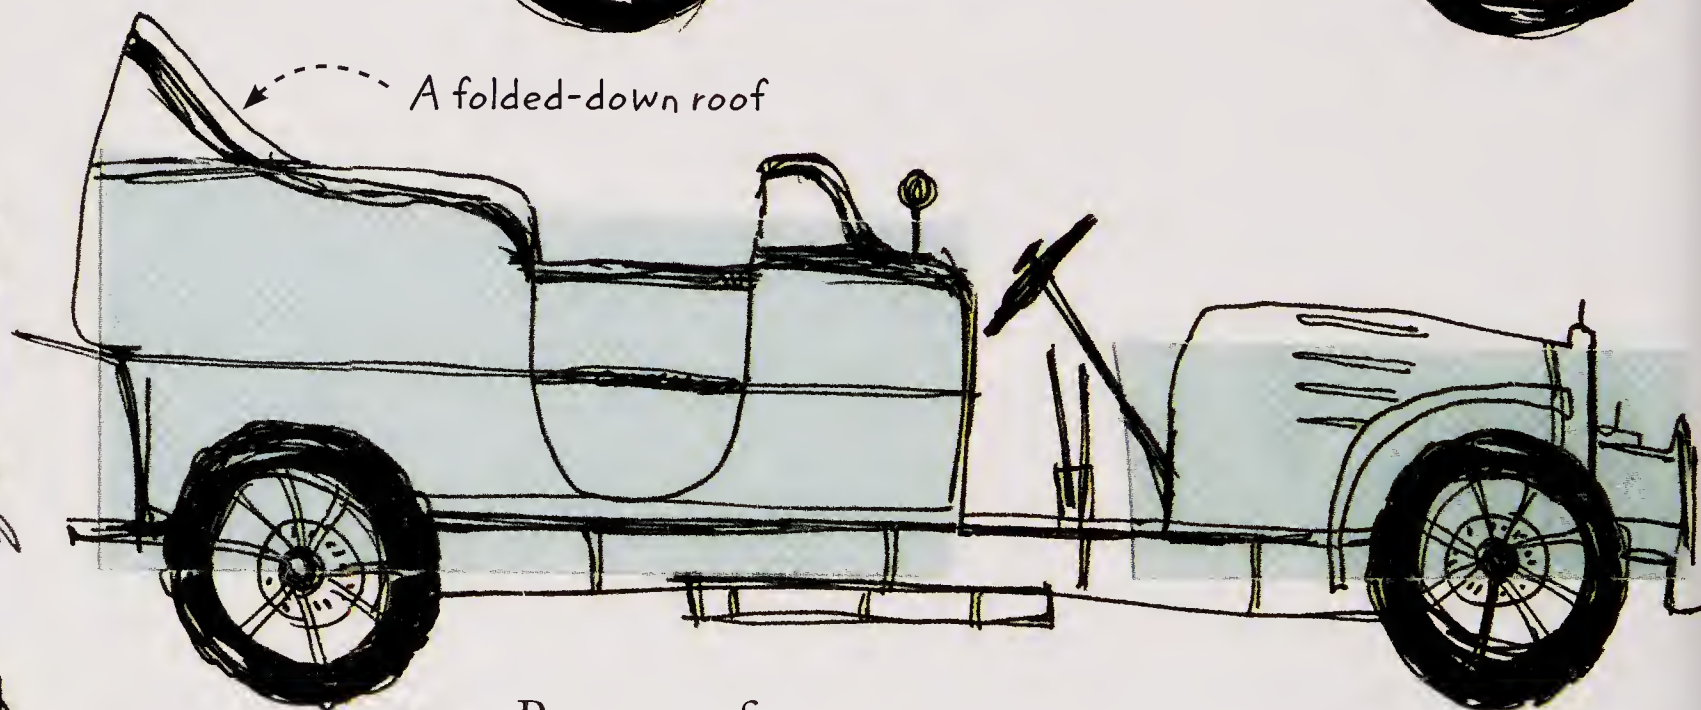

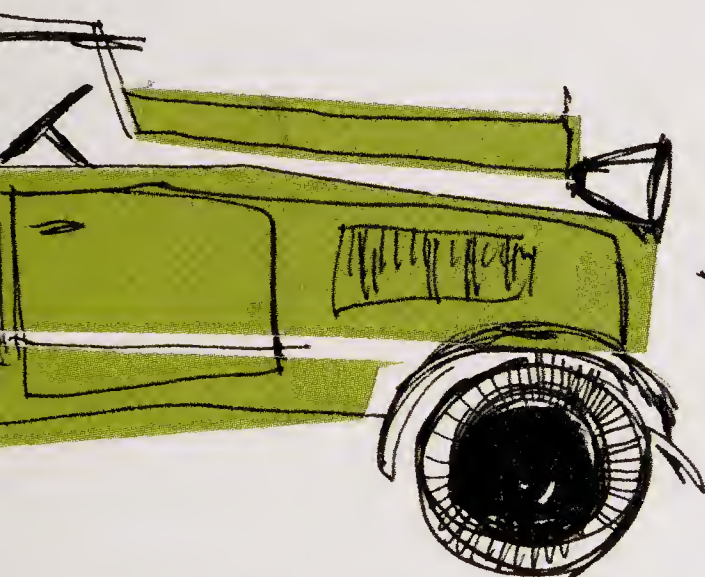

You could use the ideas shown on these pages to design your own vintage car.

These two cars are based on old racing cars.

A folded-down roof

48

Paper roof

Cut a strip of paper for the roof as well as one for the body. Draw lines for window frames.
