

Stand-up flowers

These flowers are made from paper and cardboard. They have a cardboard stand attached to the back, so they can stand up.

52 Single flower

1. Glue pieces of patterned paper onto thin cardboard. Draw the shapes above and cut them out.

2. Tape the pieces together. Decorate the flower with petals and circles, and the vase with paper strips.

Make sure they line up at the bottom.

3. For the stand, cut a rectangle from corrugated cardboard, the same height as your vase, then glue it on.

You could add some berries to the stalk as well as leaves.

4. Bend up the middle part of a paperclip, then push it into one of the grooves in the corrugated cardboard.

53 Fancy vase

Cut out a vase with a broad base and a narrow neck. Make the sides wiggle in and out.

54

Bunch of flowers

Cut out several flowers and arrange them in a vase.
