

Foil bugs

91

Make a bug

1. Squeeze a piece of foil into a bug's body, making it thinner at one end.

2. Cover it with a shiny chocolate wrapper or glue on tissue paper.

92

Striped bug

Cover a bug in tissue paper. Then, glue on strips cut from a chocolate wrapper.

93

Bug chain

Cut a long piece of thread and tie it around each bug's body to make a chain.

94

Curly antennae

Roll up long strips from a foil wrapper. Curl them around a finger before you glue them on.

You could also wrap gift ribbon around a bug to make it striped.
