

Paper shapes

These paper shapes are made from circles of different sizes, glued on top of each other. Some circles were cut into flower shapes, first.

127 Basic shape

Cut several circles from different papers, making them gradually bigger and bigger. Glue the circles together, one on top of the other. Add an old button in the middle.

130

Chain

Make lots of flowers and tape them along a piece of thread, ribbon or yarn.

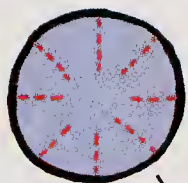

128 Individual petals

Fold a piece of paper in half several times and cut out a petal shape (this will give you several petals the same size). Glue them around the edge of a circle.

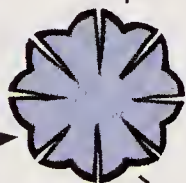

129 Folded petals

Make cuts.

Trim the petals.

Pinch the ends.

Cut out a circle. Then, make cuts on opposite sides as shown above, to make petals. Trim the end of each petal, then pinch each one to fold it. Glue more circles on top.
