

172

Flies

Fingerpaint a fly's body, then add wings cut from tissue paper or tracing paper. Draw little eyes.

173

Flying fly

Cut two pairs of wings and glue them onto a fly's body. Draw a white trail behind it to look as if it's flying.

Make flies trapped on spider webs.

174

Patterned body

Use a pencil or a black chalk pastel to draw two thick lines along a spider's back.

You could make a baby spider, like this one.
