

178

Ready for winter

Use shades of orange paper for a tree losing its leaves.

180

Fallen leaves

Cut out some leaves and curl them a little. Glue them overlapping each other in a pile beneath a tree.

179

Little birds

Cut out birds from thick paper. Cut out separate wings, legs and beaks, and glue them on. Draw an eye with a felt-tip pen.

181

Patterned bark

Draw long, thin ovals on the tree trunk. Then, add wavy lines running down the trunk and along the branches.
