

6 Display team

Make several similar planes and glue them, flying in formation, onto a background.

7

Contrails

Draw a line behind a plane for its trail, then run a finger along it to smudge it a little.

This tail was added separately.

8

Vintage plane

Draw shapes like these for the wings, fuselage and tail. Add a propeller at the front, and paper patterns on the tail and wings.

9

Different papers

Use a variety of paper to make the planes, such as graph paper, old maps and paper from magazines.
