

Box monsters

All the monsters on these pages were made from old cardboard boxes that were 'turned inside-out' to hide the lettering on them.

210 Mouthy monster

Rip off any scrappy pieces of cardboard.

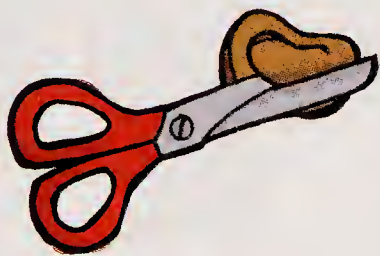

1. Very carefully, pull apart all the joins in a cardboard box.

Secure it with glue or tape.

2. Then, crease the folds back on themselves and remake the box with the plain cardboard on the outside.

3. Cut out a pair of lips from a scrap of cardboard and glue it onto the box. Fill in the middle with a felt tip pen. Draw eyes on the box, too.

211 Teeth

Cut teeth from paper and glue them inside the lips. You could make them rounded or pointed.
