

Paper butterflies

224 Make a butterfly

1. Fold two scraps of paper in half. Draw half a wing shape against each fold, like this, then cut them out.

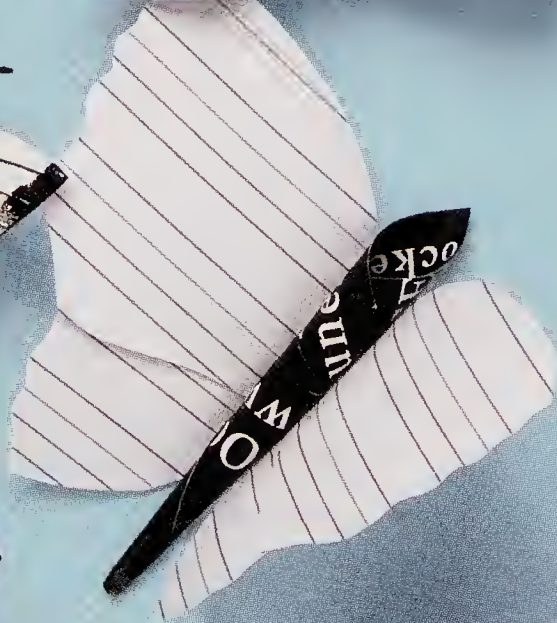

2. Open out the wings and quickly draw lines and markings on each wing. You don't have to be too neat.

3. Glue the top wing onto the bottom wing, overlapping them a little.

4. For a body, cut a piece of pipe cleaner and glue it onto the wings.

225 Chalky butterfly

Smudge patches of chalk onto the wings before you glue them together.
