

Tissue paper aquarium

247 Make a fish

1. Use a pencil to draw the outline of a fish, including its eye and fins. Then, rip a piece of tissue paper about the size of your drawing.

2. Glue the tissue paper on top of the fish. When the glue has dried, go over all your pencil lines with a black felt-tip pen.

249 Stripes

Tear strips of tissue paper and glue them along a fish's body. It doesn't matter if they overlap the edges.

248 Lots of fish

Draw lots of fish together. Glue different pieces of tissue paper on top. It doesn't matter if the paper overlaps another fish.
