

Elephant parade

275 Make an elephant

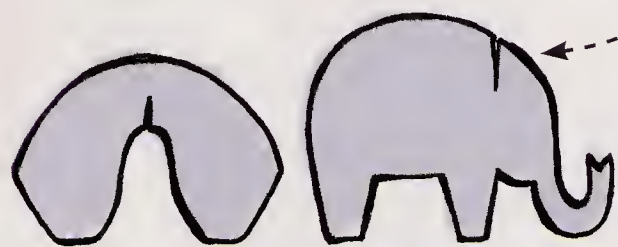

1. Copy this shape for the elephant's body onto cardboard, then cut it out.

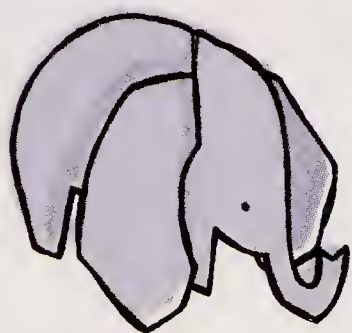

The legs and trunk should touch the edges.

2. Fold a piece of cardboard in half. Copy this shape for the ears. The bottom edge should be straight.

3. Make a short cut between the ears. Then, make a longer cut into the body, like this.

4. Draw an eye. Then, slot the ears onto the body. The legs, trunk and ears should be level so that the elephant stands up.

276 Baby elephant

Draw exactly the same shapes but make them smaller.

277 Patterned elephant

Glue patterned paper to both sides of a piece of cardboard before you draw the shapes.
