

“Approach research through the integration of diversified disciplines.”

Tu Youyou, 2015

herbal, mineral, and animal substances with medicinal potential. They then tested 380 extracts from 200 plants for their ability to kill malaria-causing *Plasmodium* parasites in mice. An extract of *Artemisia annua* (qinghao or sweet wormwood) initially seemed favorable, but the results were inconsistent.

New preparation technique

A standard way of preparing many plants in Chinese medicine is to make a decoction, in which the root is simmered
