

Buildings

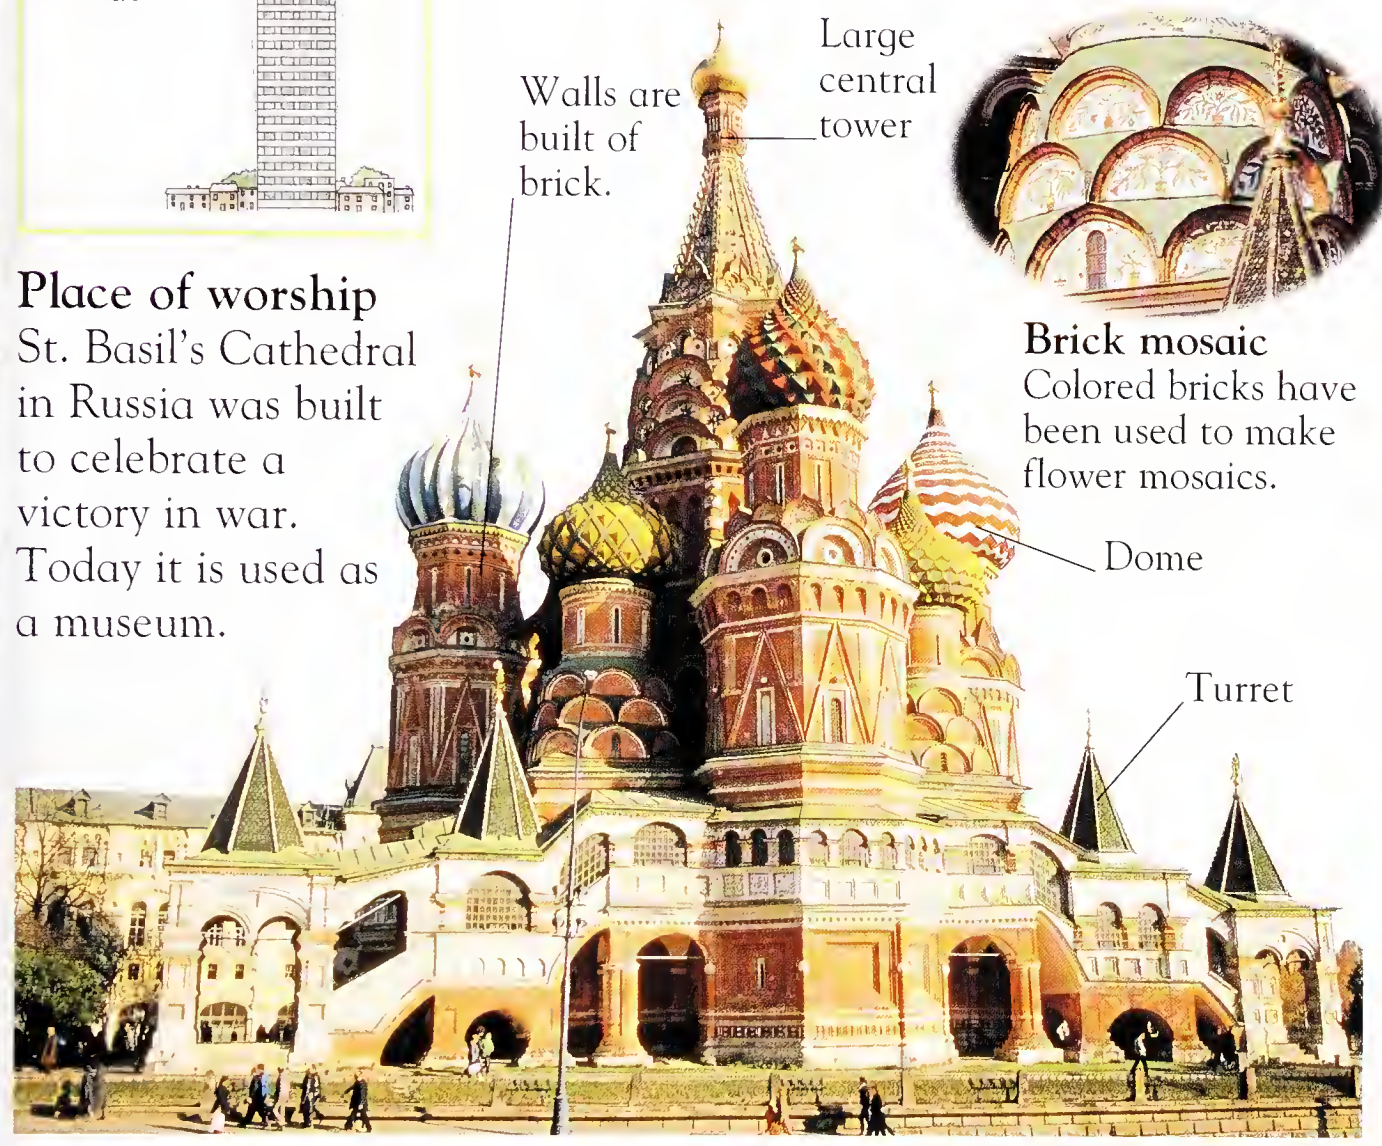

Did you know?
Tall skyscrapers are built to sway slightly in strong winds.

Every building has a purpose – whether it's for leisure, worship, or work. But each one is different – built from a mix of materials in a variety of styles.

Place of worship
St. Basil's Cathedral in Russia was built to celebrate a victory in war. Today it is used as a museum.

Walls are built of brick.

Large central tower

Brick mosaic
Colored bricks have been used to make flower mosaics.

Dome

Turret

Uses of buildings
Offices are built in town and city centers, where many people go to work.

Chrysler Building

Sydney Opera House
Theater and opera houses are buildings with large seating halls inside.

Adobe houses

Houses are different around the world, and are built of a variety of materials.

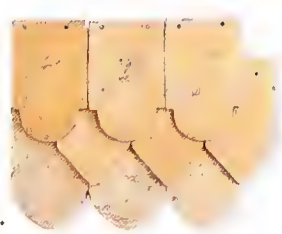

Beachy Head Lighthouse

Lighthouses are built to warn ships of rocky coasts and sandbanks.

Building materials
Builders use materials that are strong, weatherproof, and easy to find.

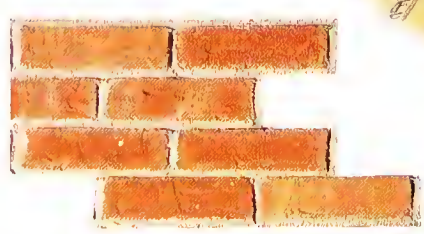

Tiles on roofs keep out rain. They can be made of clay.

Thatch is made of reeds or straw. It makes a waterproof roof.

Wooden beams can hold up floors and ceilings.

Bricks can be stuck together in rows to build walls.
