

Communications

Sign language
Some deaf people use a system of hand signals to communicate.

Talking, writing, and reading are all ways in which people share their thoughts and ideas. This is known as communication.

Did you know?
Native Americans used smoke signals to communicate quickly across long distances.

Talking
When people talk they use their voices, facial expressions, and hands to help say what they mean.

We look at each other when we talk.

Telephone
Mobile phones turn voices into radio waves, which are sent around the world by satellites.

One-way communication

Televisions pick up radio waves and change them into sounds and pictures.

Radios pick up sound waves that travel invisibly through the air.

Internet
The Internet is a world-wide computer system that people use to exchange messages.

Videophone
This phone has a TV picture of the person at the other end.

Writing
The earliest writing was carved on stone. Now we can print words quickly and easily.

Letters are delivered around the world by planes, trains, vans, and people.

Magazines and newspapers are a popular way of spreading information.

Fax machines use phone lines to send documents to other fax machines.
