

Film

Did you know?

The first films had no sound. Someone played the piano while the film ran.

Films tell stories using moving pictures, sound, and special effects to create great entertainment.

Film set

It takes a large team of people, and a lot of money, to make a film.

Clapper board

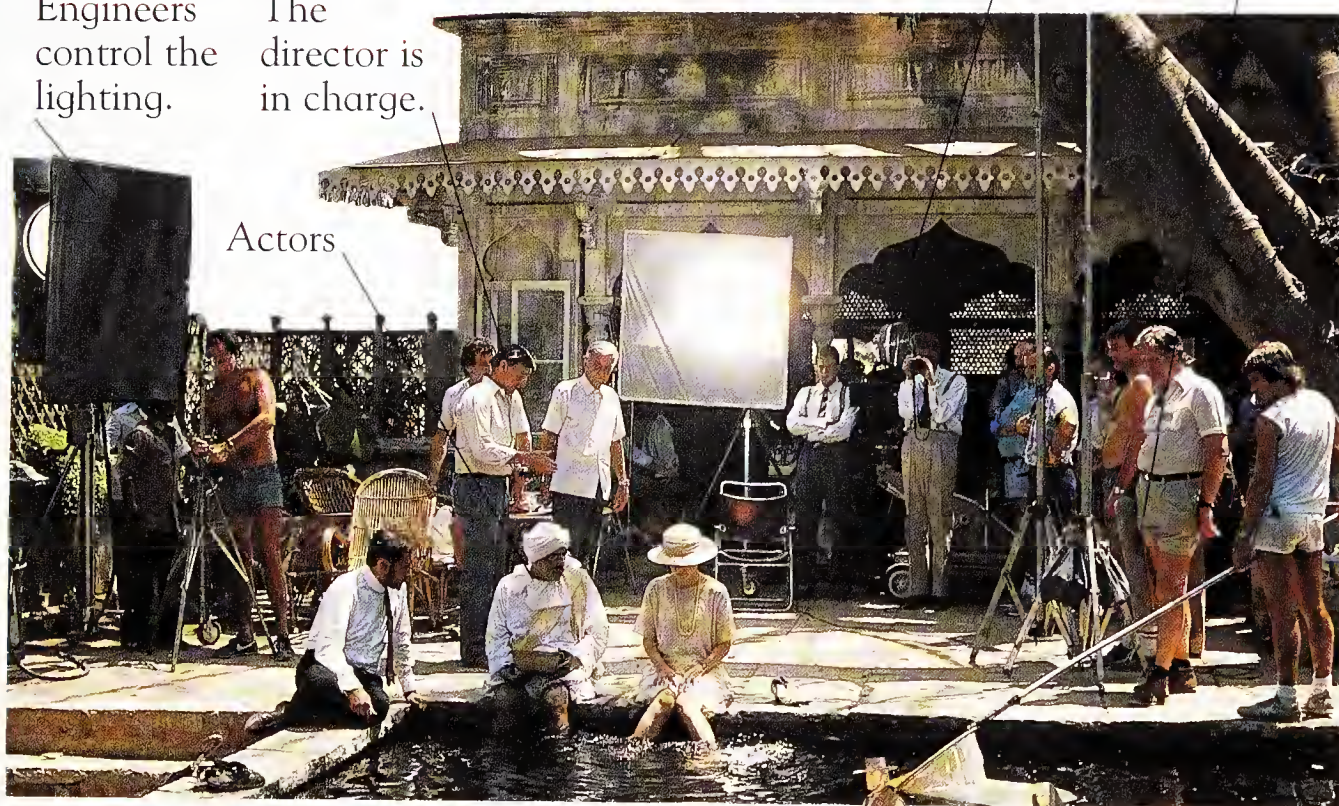

Microphones pick up every sound.

Camera

Engineers control the lighting.

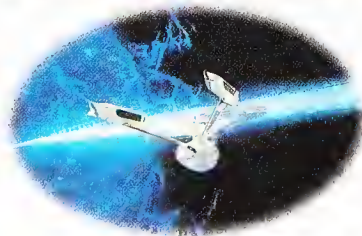

The director is in charge.

Actors

Types of films

Millions of people go to the theater to see many different types of films.

Science fiction

Western

Horror

Special-effects use the latest computer technology.

Cartoon

Cartoon films are made up of many drawings, which move when run together.

Film history

Silent films

were the first films. They were in black and white.

Talkies appeared in 1927. People flocked to the cinema to hear actors speak.

Color films were a hit when they arrived in the 1930s.
