

Inventions

Electricity

Many new inventions followed the discovery of electricity in 1831.

Electric heaters are more convenient than fires.

Electric light is safer than candlelight or gas lamps.

Electric irons were first used 100 years ago.

Communications

Modern inventions have helped people speak to each other over long distances.

Telephones send sounds along wires.

Satellite dishes send and receive messages from all around the world.

The wheel, X rays, computer games – inventions can change our lives, or simply be fun. They are new ideas that do a job in an original way.

Transportation

The need to travel has led to many great inventions.

Axle

Wooden crossbar

Cars first appeared about 100 years ago. Now millions of people drive.

Planes were box-shaped at first. Today they are fast, large, and sleek.

Wheels are used on many kinds of vehicles. They were invented 5,000 years ago.

Entertainment

Modern inventions have brought entertainment into the home.

Television is the most popular kind of home entertainment.

Computer games are often small and light, so they can be carried anywhere.

Compact discs play music that sounds as though it is playing live.

Medicine

Medical inventions help people live longer, healthier, and more active lives.

False teeth help people who have lost their real teeth eat.

X rays can help doctors see inside our bodies without cutting them open.

Stethoscopes, invented in 1855, are used to listen to our heart or lungs.

Did you know?

Thomas Edison, the inventor of the lightbulb, was expelled from school for laziness! (1847–1931)
