

Maps

World map

1 A globe is the most accurate map of the world.

2 A flat map is made by flattening out the globe.

3 The gaps are filled in with extra bits of land and ocean.

Did you know?

Space satellites take photos of the Earth to help people make more accurate maps.

Abruzzo National Park, southern Italy

Map reading

You must be able to read a map to find your way.

Symbols

The special signs on a map are symbols. A symbol represents something real. Symbols are explained in a key.

Key

A very beautiful place

A good viewpoint

Tourist information

Mount Marsicano

Main road

Minor road

Footpath

Maps are pictures that show places, such as towns, from above. We use maps to find our way around.

Beech and pine forest

Lake Barrea

This symbol shows you where north is on the map.

Types of maps

Street maps name all the streets in a town or city.

Weather maps show the weather in different places.

Subway maps show where underground train lines go.

Floor plans show you the layout of a building.

Road maps help drivers plan a journey.
