

Antarctica

Antarctica is a vast, ice-covered continent near the south pole. No one lives here permanently. It is the coldest and windiest place on Earth.

Antarctic summer

In some places, the ice melts in summer. But the ground remains frozen.

Iceberg

Icebergs are huge chunks of ice that break off from the land and float in the ocean.

Explorers at south pole

South pole

The south pole is the most southerly point on the Earth.

Wildlife

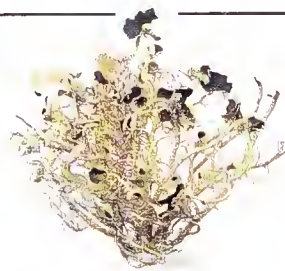

Some animals and a few simple plants have adapted to life here. The animals hunt for food in the ocean.

Albatross

Penguins

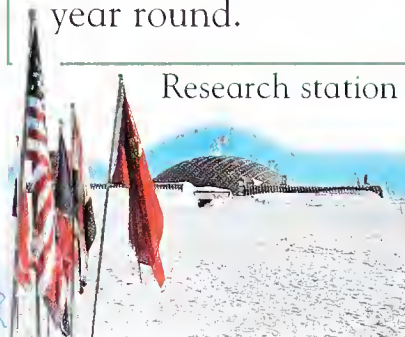

Moss

Leopard seal

- Did you know?**
- Antarctica is bigger than Europe and the US put together.
 - Antarctica is actually a desert! It gets no rain all year round.

Research station

Scientists

Scientists from around the world visit Antarctica to study the land and its wildlife.

Tourism

Tourists admire Antarctica's scenery from large cruise ships.

Minerals

Below the ice and rock lie coal, copper, gold, and other valuable materials.
