New Zealand and Pacific Islands
Hot springs, volcanoes, and white, sandy beaches are just some of the features of New Zealand and the Pacific islands.

- Did you know?**
- New Zealand's most beautiful areas are protected as national parks.
 - There are about 30,000 islands in the Pacific Ocean.

Fiji
Fiji is made up of 322 islands. Much of the land is covered with forest and surrounded by coral reefs.

Tropical island
The Pacific islands have long, sandy beaches and sparkling blue seas.

Mount Cook
Mount Cook is the highest mountain in New Zealand.

Fjord
New Zealand's coastline has deep inlets called fjords.

Sheep
The wet climate provides good grazing for sheep.

Kiwi
Kiwi birds cannot fly. They live in New Zealand.

Mud pools
Heat from inside the Earth makes hot mud pools in New Zealand.

Geyser
Geysers are hot water fountains that shoot out of the ground.

Kakapo
This New Zealand parrot is very rare. It is too heavy to fly.

Volcano
There are many active volcanoes in New Zealand.

Lake
Beautiful freshwater lakes fill the craters in the mountains.
