

Cars

Cars come in all shapes and sizes and are used by all sorts of people. The job a car does determines its looks, its performance, and its price!

Family car

Engineers use computers to create the design for a car, such as this family station wagon.

Baby car seat

Babies sit in small seats with straps to keep them safe.

Airbag

Airbags fill up with air to protect people in a crash.

Types of cars

Classic cars are old, stylish cars that have survived from the early years of car design.

Police cars are fitted with radios, sirens, and other special equipment.

Customized cars have been chopped up, added to, and painted to make them look unusual.

Large luggage space

Five comfortable passenger seats

Streamlined shape

Small engine cuts down fuel consumption

Turn signals warn other drivers when the car is going to turn.

Mirror

Car mirrors help drivers see the road behind them.

Tire

Different cars use different kinds of tires.

Road tire Race car tire

Wheel

Battery-run car

This car is for a disabled driver. It's environmentally friendly because it runs on a battery, not fuel.

All-terrain vehicles have powerful engines. Big wheels keep a grip on muddy tracks.

Race cars have room only for the driver. They are low, streamlined, and fast.

Did you know?
The world's longest car has 26 wheels and a tiny swimming pool on board!
