

Early humans

Tools and weapons

A stone adze was used to cut wood or dig up roots.

Diggers were sticks used to dig up grubs from the ground.

A leather shoulder bag carried a hunter's bow and arrows.

Arrowheads and blades were made from a hard stone called flint.

Arrows

Fire sticks

Fire

Fire kept people warm, cooked their food, and frightened wild animals away.

Dry wood or grass

Cave painting

Early artists painted pictures of animals on cave walls.

Rubbing sticks together made a spark. This set fire to the grass.

Bread made from grains

Clothing

Clothes were made from wool and hairy animal skins.

Wool

Animal skin

Dyes from plants

Food

People hunted animals, dug up roots, and gathered seeds for food.

Salmon

Deer

Nuts and berries
