

Explorers

Travelers

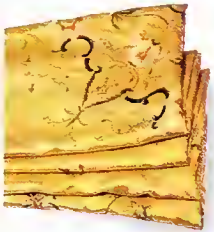

Pacific islanders were the first to cross the Pacific Ocean.

The **Vikings** sailed to the south to find fertile farmland.

Viking helmet

Merchants explored the route between China and Europe to trade in silk.

Arabs traveled in the 13th century to trade and find new lands.

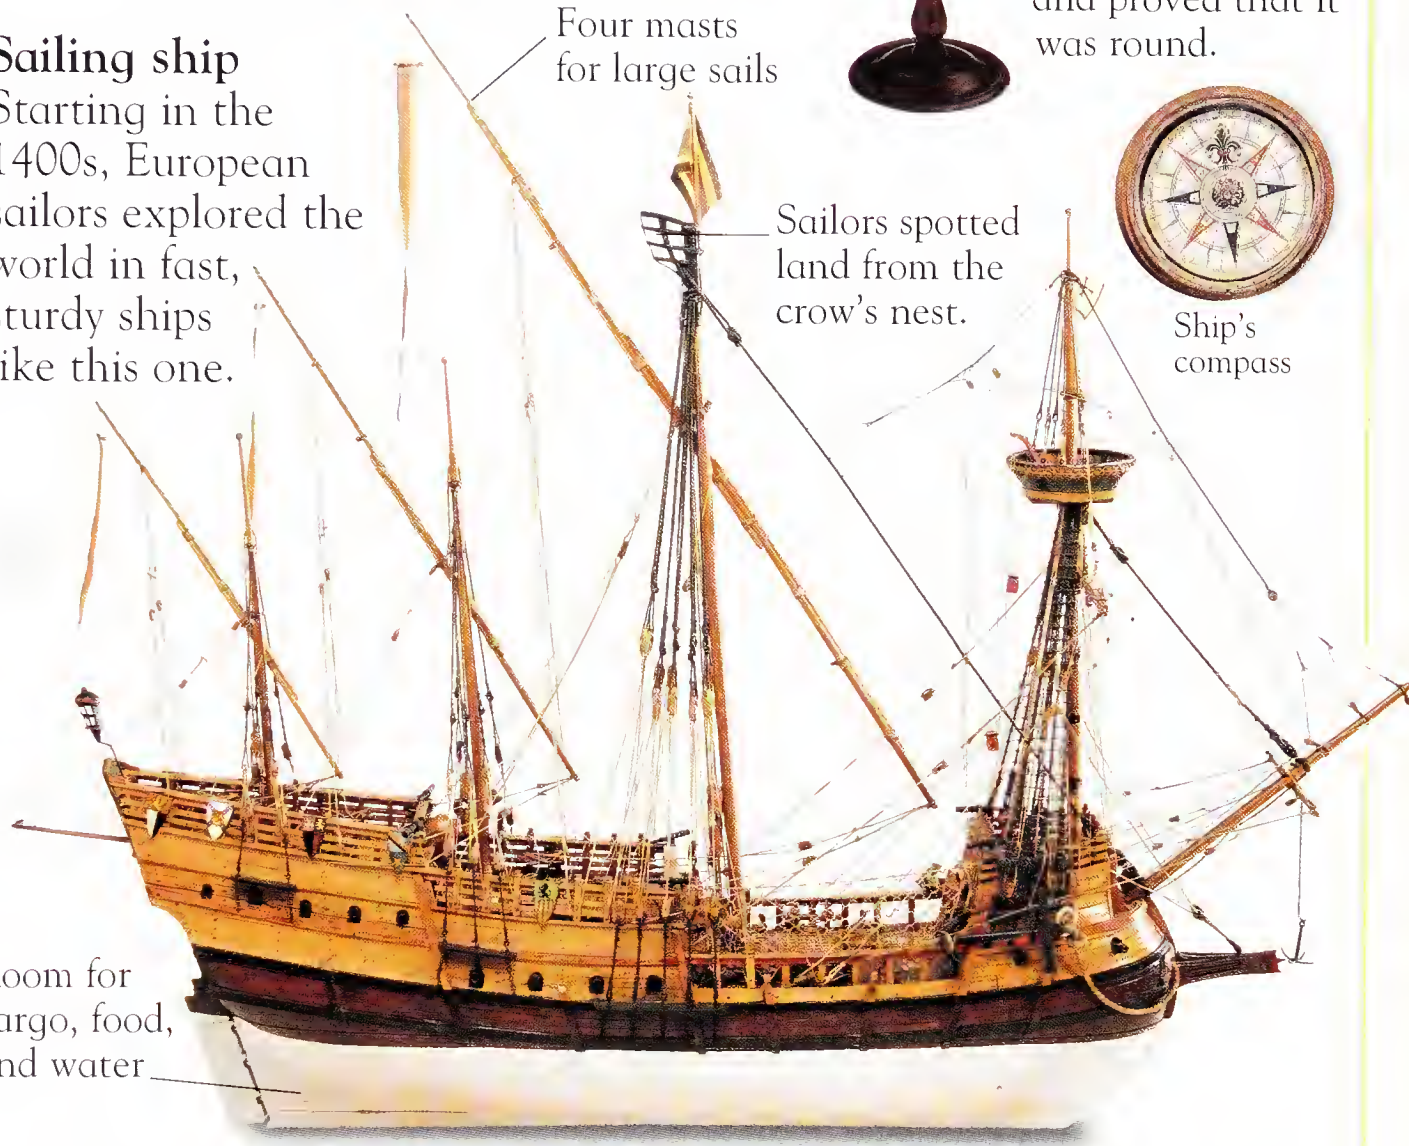

Columbus, a Spanish explorer, crossed the Atlantic Ocean using an astrolabe.

For thousands of years people have explored the world, hoping to find fertile farmland, fine goods, and riches.

Sailing ship

Starting in the 1400s, European sailors explored the world in fast, sturdy ships like this one.

Four masts for large sails

Sailors spotted land from the crow's nest.

Room for cargo, food, and water

Round Earth

In 1519 a famous Spanish explorer, Magellan, sailed around the world – and proved that it was round.

Ship's compass

Sextant

Finding the way

Explorers used the sun, stars, and instruments to find their way.

Backstaff

Telescope

Jade

Goods

Explorers brought home new foods and riches from around the world.

Cloves

Cinnamon

Pineapple

Did you know?

Before the 1520's, most people thought the world was flat!
