

Farm animals

Did you know?

China's hens lay so many eggs each year they could make an omelette for everyone in the whole world.

Types of cattle farming

Hereford bull

Some cattle are farmed for meat.

Jersey cow

Others are farmed for their milk.

Fish farming

Trout and salmon are raised on fish farms. The farms provide cheap fish.

Farmers have kept and raised animals for thousands of years.

They provide people with food and other useful materials.

Sheep

Farmers around the world keep sheep for their meat, milk, and soft, warm wool.

The sheep are kept in flocks.

Warm coat in winter

Sheep shearing

Wool comes off in one piece called a fleece.

Sheep's cheese

Sheep's milk

Wool is used to make clothing, fabrics, and carpets.

Short coat keeps sheep cool in summer.

Sheep's wool is warm and oily.

Types of farm animals

Llamas provide milk, meat, leather, and wool.

Turkeys are bred for their meat.

Ostriches are farmed for their skin, meat, and feathers.

Pigs are farmed for their meat and leather.

Free-range farming

Free-range farming allows farm animals to wander around freely.

Intensive farming

Some farmers keep animals indoors in small pens. This is called intensive farming.
