

Farming

In some countries, farmers use rice harvesters to gather rice quickly.

Rice farming

Most rice is grown in parts of Asia where the weather is warm and wet.

Most of the food that we buy each day in stores is grown on farms throughout the world.

Rice plants grow in water.

More than half the world's people live on rice.

Flooded rice fields are called paddy fields.

Most of the work is done by hand.

Rice products

Fried rice

Rice cakes

Noodles

Rice paper

Farm tools and machines

Ox-drawn plows slowly break up soil for planting.

Tractors are expensive, but powerful. This one is sowing seeds.

Crop sprayers spray chemicals over plants to protect them from pests.

Pitchforks are an old farm tool. They are used to pick up hay.

Scythes are used to harvest crops by hand. The blade is very sharp.

Combine harvesters gather cereal crops quickly and efficiently.

Did you know?

In southern Europe, farmers use pigs to find mushrooms called truffles.

Farm crops

Vegetables are grown outside in fields and inside in greenhouses.

Squash

Sugar beet

Fruits grow on plantations, in orchards, and in fields.

Apples

Cape gooseberry

Corn

Wheat

Cereals, such as wheat and corn, are grown in huge fields around the world.
