

Foods of the world

Pineapples, peanuts, and pears – our food comes from all over the world, adding color, flavor, and variety to our diet.

Did you know?

Every day humans eat a pile of rice more than six times the size of the Great Pyramid!

Wheat

Canada has the ideal climate for wheat, which needs a wet spring and a dry summer.

Olive oil

Olives grow in the hot, dry climate of southern Europe.

Olives are squeezed to make oil.

Root vegetables

Root vegetables, such as turnips, grow well in the cool, wet climate of northern Asia.

Bananas

Bananas grow in a hot, tropical climate, like that of South America.

Chocolate

Chocolate is made from the beans of the cacao tree. These grow in hot, wet African rain forests.

Peaches

Peaches are grown in Australia, where there are cool springs and hot summers.

Tea

Tea plants grow in warm, wet, and hilly areas throughout Southeast Asia.

Transporting food

Planes are used to transport fruits and vegetables. Fresh food, like oranges, rots if it is not eaten quickly.

Orange grove

Fishing boats far from land pack the fish they catch in ice. This keeps the fish fresh until the boat returns to shore.

Trucks carry dried foods, like spices, to a market. Dried foods keep well.
