

F major

B $\flat$ major

E $\flat$ major

A $\flat$ major

D $\flat$ major

G $\flat$ major

C major

Enharmonic equivalents

Two scales that use exactly the same notes on the keyboard, but give all their notes different names, are known as enharmonic equivalents. The pairs of major scales that are enharmonic equivalents are F $\sharp$ major and G $\flat$ major (shown here), B major and C $\flat$ major, and C $\sharp$ major and D $\flat$ major.

◁ On the keyboard

The F $\sharp$ major and G $\flat$ major scales use the same notes, but give their notes different names.
