

Examples of half steps

Here are some more examples of half steps on the keyboard and on the staff, including a mixture of black keys, white keys, sharps, flats, and naturals.

21

◁ **E $\flat$ to E:**

E $\flat$ moves up one half step to E. The natural symbol on the staff cancels the flat.

22

◁ **C to D $\flat$:**

C moves up one half step to D $\flat$. It is important to write the flat symbol before D, or C would move up a whole step.

23

◁ **B to C**

B moves up one half step to C. Since no sharps or flats are involved or canceled, no symbols are written on the staff.

24

◁ **G to G $\sharp$:**

G moves up one half step to G $\sharp$. The sharp symbol shows that G has moved up to the black key immediately above it on the keyboard.
