

2nd note is one half step lower than in natural minor scale.

- 61 ▽ **Phrygian mode**
This modal scale is similar to the natural minor scale, but its second note is one half step lower.

4th note is one half step higher than in major scale.

- 62 ▽ **Lydian mode**
The Lydian modal scale is similar to the major scale, but its fourth note is one half step higher.

7th note is one half step lower than in major scale.

- 63 ▽ **Mixolydian mode**
The Mixolydian modal scale is similar to the major scale, but its seventh note is one half step lower.

- 64 ▽ **Aeolian mode**
The Aeolian modal scale is exactly the same as the natural minor scale. Music in a minor key is in Aeolian mode if it is based on that key's natural minor scale.

Diminished 5th, not perfect 5th.

- 65 ▽ **Locrian mode**
The Locrian modal scale is not similar to the major or natural minor scale—it is the only modal scale with a diminished interval between its first and fifth note.
