

Satellite launcher

I AM A SATELLITE LAUNCHER
SEE HOW I GO!

I am a rocket that carries a
satellite into space and
launches it into orbit.

Blastoff! Soon I'm in space
just outside the Earth's
atmosphere. Then I blow open
my nose cone and release the
satellite into orbit.

NOSE CONE

My nose cone is like a
garage where a satellite
can park safely.

ROCKET ENGINE
